

# ALASKA COASTAL BLACK BEAR

## Boat Based Hunting and Fishing Adventure

If your looking to book a true Alaskan adventure hunt for black bear this is our top option. Our clients board a large and comfortable boat that they will call home and head out across the salt water to anchor up in protected bays. Here they will use smaller skiffs to access over 70 miles of private shoreline glassing for black bears feeding on the beaches and in the estuaries during the peak season in May and early June each spring. Our hunters live on the boat during their stay where we have a large galley, comfortable relaxation area, and a large top deck and we try to get everyone a taste of the Alaskan fishing experience with halibut and other bottom fish species taken during the spring hunts. The boat is limited to four people each week of the season and non-hunting guests are welcome to book a fishing package and come along for the Alaskan experience. Please call our office for additional details, dates, and availability.
