

# NUNAVUT CARIBOU

## Central Canadian Barren Ground Caribou

These hunts are conducted on large lakes located in the Nunavut Territory of Canada. We have two camps on two large lakes that are separated by less than a two mile portage. These large bodies of water act as a natural travel barrier and corridor for the migrating caribou. The camps are located at the southern end of the caribou summer range so we starting hunting in mid August and end in mid September when all of the caribou have moved through to the south. We have been extremely successful and the camps are each limited to eight hunters each week for five weeks, forty hunters each season maximum. If you are interested in booking a terrific caribou hunting experience please call our office for more details on this outstanding hunt.
