

Suggested Equipment List

This hunt is available through our office in multiple locations and each has its own suggested equipment list pertinent to that specific outfitter or camp. Please contact our office for the specific equipment list for your hunt. We can easily email you the equipment list in WORD or PDF format immediately.

Equipment Suggestions: Don't buy poor gear, invest money in quality clothing, backpacks, proper fitting boots, accurate rifles and terminal performance bullets, and damn good scopes and binoculars. These hunts are expensive and bad gear can cost you a quality experience of a lifetime. Please call us for suggestions on manufacturers and brands that won't let you down!
